PROFILE

Full-Stack Developer with a professional background in biotech production and technical support. Specialized in building secure, multi-tenant systems using React, Next.js, and Prisma. Proven ability to implement real-time features like Socket.io and WebSocket notifications, JWT authentication, and RBAC security — merging industrial precision with scalable web solutions.

SKILLS

Languages: JavaScript, TypeScript, HTML, CSS
Frameworks & Libraries: React, Next.js, Node.js, Express.js, TailwindCSS, Zustand, Socket.io, JWT, Bcrypt, Google OAuth, Git, Axios, Prisma, Figma
Databases: MySQL, PostgreSQL
Tools: MS Office, Filmora
Soft Skills: Troubleshooting, Documentation

LANGUAGES

English (Fluent), Spanish (Basic)

PROJECTS

LuxeFuel | Multi-Tenant Fuel & EV Tracking Platform (Personal) | Apr – May 2026

- Architected a multi-tenant SaaS backend using Node.js, Express, Prisma, and MySQL, with role-based access control (Admin, Driver, User, Individual) and organization-level data scoping
 - Built a fuel and EV/hybrid vehicle tracking system with per-fill carbon emissions calculations, consumption analytics, and an admin dashboard for fleet management and audit logging
 - Developed the frontend in React and Vite with Zustand, React Hook Form, Recharts dashboards, and PDF report export via jsPDF
-

Wong Nork | Restaurant Discovery & Social Platform (Group project) | Apr – Jun 2026

- Architected a mobile-first restaurant discovery engine using React and Prisma, optimizing data retrieval for local business listings
 - Engineered real-time bidirectional communication using Socket.io, enabling instant group notifications and high-concurrency data synchronization
 - Integrated the Mapbox API, improving user engagement by providing real-time visual mapping of local listings
-

The Velvet Hideaway | Virtual Ambiance & Mixology App (Personal)| Apr – Jun 2026

- Developed a full-stack platform using React and Node.js to manage complex, categorized recipe data
 - Optimized application performance by integrating Cloudinary, reducing image payload sizes by 40% and improving overall page load speed
 - Implemented secure JWT authentication and Role-Based Access Control (RBAC) for distinct user and admin interfaces
-

WORK EXPERIENCES

Technical Support — Oskon Co., Ltd. | Jan 2025 – Oct 2025

- Provided technical consultation on specialized filtration systems and lab equipment to meet precise client specifications
- Managed technical documentation and product specs for industrial-grade microbial testing systems

Bioproduct Production Staff — Innovative Center for Production of Industrially Used Microorganisms |Jul 2023 – Dec 2024

- Managed high-stakes fermentation cycles with a zero-error mindset, ensuring 100% batch integrity and strict adherence to sterile protocols
 - Monitored real-time production data to optimize yields and performed root-cause analysis on system deviations
 - Maintained rigorous audit trails and production logs to ensure total data accuracy and regulatory validation
-

EDUCATION

FullStack Dev Bootcamp — CodeCamp Thailand #22 | Jan – Jun 2026

B.S. Fermentation Technology — King Mongkut's Institute of Technology Ladkrabang |2018 – 2022

Ratchasima Wittayalai School, Sci-Math Program | 2014 – 2018
